– *it's a tree story:*

”

Our commitment to nature and our values shapes everything we do.

Dr Georg Emprechtner,
CEO and owner of TEAM 7

Looking at our world today, it is clearly time to acknowledge the fundamental importance of nature in our lives, and to take responsibility for our ecological footprint. It is time to prioritise lasting value – and to treat nature and our fellow humans with respect.

At TEAM 7, sustainability and environmental protection are at the heart of everything we do. Because we are a part of nature, and how we interact with it is a deciding factor for our future.

SMALL INSECTS. GREAT EFFECT.

Our seven bee colonies taken care of by our TEAM 7 beekeepers at our Upper Austrian site in Pram symbolise our understanding for sustainable economies, as honeybees play a crucial role in the cycle of nature. They support the balance in our ecosystems and protect plant variety. In this way, our bees contribute to the preservation of important natural environments – they are our fundamentals for life. Ultimately this also benefits us, the people who inhabit them. They pollinate almost 80% of crops and wild plants. These also include trees which we need for the manufacturing of our furniture. So in this respect, our furniture production already starts with the bees!

OUT OF LOVE FOR NATURE

We love wood. And we love nature. We actively support climate protection thanks to our decision to manufacture durable furniture from natural, renewable raw materials in an environmentally sustainable fashion. A crucial contribution which non-durable and synthetic products are unable to fulfil. The concept of "sustainability" has its roots in forestry and embodies a simple principle: for every tree that is felled, at least one new tree is planted. The valuable wood grows ever stronger in these sustainably managed forests – just like our love for this raw material. Because these forests, in which the trees for our furniture grow, play an important part as durable carbon storers. After all, the carbon from around one tonne of CO₂ is bound in one cubic metre wood. We then use this wood to make furniture, which in turn stores the bound carbon for many years. While this is happening, the next trees have already started growing and extracting CO₂ from our atmosphere.

930 t CO₂

ARE EXTRACTED FROM THE
ATMOSPHERE EVERY YEAR THANKS
TO OUR ALREADY HUGE AND EVER
EXPANDING 77-HECTAR FOREST

WE WERE ALREADY ECO BEFORE IT WAS COOL

Back in the early 1980s, we decided to consistently follow "green" principles and convert our production completely to wood from sustainable forestry. This commitment to nature and our values shapes everything we do. We have set ourselves strict guidelines: only by living responsibly and sustainably can we preserve the fundamentals of life for future generations. We always consider both the human aspect and nature itself when producing our furniture. Careful use of resources has already been part of our everyday production methods for several decades. So we place great emphasis on ecological and sustainable production.

FROM THE FOREST TO THE FINISHED FURNITURE: IT'S IN OUR HANDS

The entire production process for our furniture is carried out in our own workshops here in Austria: from natural seasoning and drying of the wood, to making the solid wood panels, right through to the finished product of our traditional artisan craftsmanship. This means we can guarantee high standards and environmentally friendly production. And the quality that we promise: made in Austria.

every order custom made
in our own workshops in Austria

LIVING WITH ALL THE SENSES

A longing for things that are genuine is inherent to human nature. The search for naturalness and authenticity is becoming more and more important, particularly in this increasingly digital age. We can only feel things fully with all our senses when they are real. This is just not possible in the virtual world. The open-pore, living wood we use to make our furniture has the unique ability to appeal to our senses. That's why we do everything we can to bring wood and its authentic characteristics into your home. Experience what we mean by "living with all the senses" and in tune with nature.

TEAM 7 100%

VIRTUAL

 <p>SIGHT</p> <p>Our carefully selected wood surfaces are sorted by hand and genuinely unique. Like the trees they are made from.</p>	 <p>HEARING</p> <p>Guitars, violins and pianos – they all depend on real wood for their sound.</p>	 <p>TOUCH</p> <p>Enjoy the warmth of our oiled, open-pore wooden surfaces – you can literally feel it.</p>	 <p>SMELL</p> <p>Close your eyes and enjoy the scent of real wood.</p>	 <p>TASTE</p> <p>Fine wine from a wood barrel, fresh bread from a wood-burning stove: pure pleasure.</p>
---	--	--	---	--

”

The finest hardwood, assembled without formaldehyde, finished with natural oil – and that's it.

Dr Georg Emprechtinger,
CEO and owner of TEAM 7

Wood enriches our lives in many ways: with its beauty, warmth and texture. To ensure we preserve these qualities, we process this superb natural material in its purest form. This is why the TEAM 7 promise applies to the manufacturing of all our wood furniture: pure solid hardwood from sustainable forestry, assembled without formaldehyde, finished with natural oil – and that's it! This is how we make sure the wood remains free of harmful substances and retains its wonderful properties.

PURE SOLID WOOD

Our furniture of pure solid wood supports a healthy living environment. That's no surprise – after all, the trees themselves come from healthy forests. Nurtured for decades in sustainable forestry, we process the wood with the greatest of care – and from the very outset. The choice of wood type is decisive for the later quality of our furniture. Genuine, open-pore wood brings comfort and warmth into your home. It breathes, absorbs humidity and releases it again when the air is dry. This creates a noticeably more pleasant atmosphere in the room. Wood also has a natural anti-static and anti-bacterial effect.

ULTRAMODERN THREE-LAYER TECHNOLOGY

In our board factory, we produce high-quality three-layer solid wood boards. Three layers of the finest hardwood are glued together transversely. This technology preserves the naturalness and the original strength of the wood. At the same time it provides our boards with a tremendous structural stability, opening up unique opportunities for us in design and function.

NATURALLY BEAUTIFUL

Mighty oaks, over 100 years old, provide the wood for our **echt.zeit** table (see next page). These are grown in our own TEAM 7 forest and the Vienna Woods. Only certain tree trunks can be used for the "fillet pieces" needed to create one of the **echt.zeit** tables. The knowledge and experience of the traditional craftsman therefore play a decisive role in the choice of wood. The thick trunks ranging from one to two metres in size are carefully sawed into slabs with a lot of finesse. These are then dried naturally and gently. This process can last two years before our carpenters are able to carve out an **echt.zeit** table.

Dr Georg Emprechtinger,
CEO and owner of TEAM 7

TRULY UNIQUE

echt.zeit

The **echt.zeit** table has an impressive table top crafted from solid slabs of untreated wood. The brushed table top truly brings the natural features of the wood to the fore. Every table is totally unique.

”

*It's time to go back to the roots. To real encounters,
real conversation and really good times – together!*

Sebastian Desch, designer

echt.zeit

The “leaf” from the TEAM 7 logo locks the two parts of the table top firmly together, and is yet another example of our perfectionist detailing. The neat panel supports made of bronzed steel are modestly set back and their structural design ensures maximum stability.

THE CLASSICS OF TOMORROW

magnum

Its timelessly beautiful design makes our **magnum** table a true classic that inspires with its innovative technology and lovingly detailed craftsmanship, such as the high-quality mortice-and-tenon joints.

magnum

In addition to selecting various wood types, you can also choose to have table inserts in glass in numerous colours or in high quality ceramic for the **magnum** table. Thanks to its patented **2soft** swivel mechanism, it can be extended by 50 cm, 2 × 50 cm or 100 cm in one soft, cushioned movement.

ceramic colours

fig. above: **magnum** extendable table, 200 × 100 + 100 cm, wood type oak, iron moss ceramic | **magnum** cantilever chair, taupe Stricktex, base with stainless steel finish

qr.team7.at/filigno-sideboard

filigno

Genuine solid wood, shaped with precise and delicate craftsmanship, accentuates the modern design style of **filigno** occasional furniture. Highboards can be fitted with functional interiors for glasses and small devices, including a dual power point. Both interiors are fitted with LED lighting.

fig.: **filigno** highboard 2 with interior partition for glasses with mirror, wood type oak white oil, basalt black ceramic

REAL CRAFTSMANSHIP

We've been making furniture since 1959. This experience makes itself felt. Every piece of TEAM 7 furniture is unique: hand built in our workshop by experienced joiners using traditional Austrian artisan craftsmanship. It guarantees the high quality of our products. Not only do we create furniture, we also create lasting value.

IMPRESSIVE MATERIAL STRENGTHS

nox

With its smooth extension and the soft-close **2soft** swivel mechanism, the **nox** table can grow by 60 or 120 cm in next to no time. So you can create space for up to four more people.

Find out more
about the **nox** table!
[qr.team7.at/
nox-table-video](https://qr.team7.at/nox-table-video)

nox

Elegant metal slides and the gently rounded edges of the solid table top distinguish the **nox** table. The shape, height, and depth of our **nox** bench backrest accommodate different seating positions for superior seating comfort.

figs. above and left: **nox** extendable table, 225 x 100 + 120 cm, wood type wild walnut, matt black frame | **nox** bench with backrest, 225 cm, wood type walnut, anthracite leather, matt black frame | **magnum** cantilever chair, anthracite leather, matt black base | **nox** sideboard 11, wood type walnut, palladium glass

fig. below: **nox** bench with and without backrest, 225 cm, wood type walnut, anthracite leather, matt black frame

nox | magnum

A perfect match for the **nox** table and bench is the **magnum** cantilever chair in leather. For the **nox** sideboards, you can choose between sliding doors made of solid wood or glass, or you could opt for drawers instead. The glass cabinets are offered in two different heights and widths.

fig. above: **nox** extendable table, 225 x 100 + 120 cm, wood type walnut, frame with stainless steel finish | **nox** bench with backrest, 225 cm, wood type walnut, blue leather, frame with stainless steel finish | **magnum** cantilever chair, blue leather, frame with stainless steel finish

LIGHT-FOOTED GIANT

yps

The base at the centre of the **yps** table offers generous legroom and enough space for comfortable access when combined with a bench or corner bench. The Y-shaped, flared legs help stabilise the table and give it a modern appearance.

”

yps is both solid and dynamic in a light-footed way;
as if time were standing still for a moment.

Jacob Strobel, designer

*yps*

Our **yps** extendable table catches the eye with the same design principle as the **yps** non-extendable table: angular, puristic, made completely of genuine, strong, solid wood. On one or both sides, **yps** can be extended by 60 cm each, or equipped with a combination of table insert and a cutlery drawer.

fig.: **yps** extendable table, 200 × 100 + 60 cm, wood type oak
lui chair, wood type oak, black-brown leather

*yps*

The **yps** bench makes the Y design element stand out with its refined stitching in the seating and its premium micro-pocket springs provide superior and lasting seating comfort. The bench is available as a corner seat or a straight bench. You can choose between flared legs and side panels from solid wood for the base.

fig. above: **yps** table, 180 × 110 cm, wood type walnut
yps corner bench, 249 cm, wood type walnut, sludge brown leather

fig. right: **yps** corner bench, 249 cm, wood type walnut, sludge brown leather

fig. below: **yps** bench with side panel, 264 cm, wood type walnut, Maple 862 fabric

IMPRESSES IN EVERY SIZE

mylon

The **mylon** table is pleasing in small formats thanks to its balanced proportions, while the flared legs in larger designs emphasise the impressive span of the piece.

mylon

With our innovative extension technology, you can expand the **mylon** table by 50, 2 x 50 or 100 cm to transform it from a cosy family table into a stately banquet board.

fig. above: **mylon** extendable table, 200 x 100 + 100 cm, wood type oak | **eviva** chair, wood type oak, Canvas 134 fabric

fig. right: **mylon** extendable table, 175 x 90 + 100 cm, wood type beech heartwood | **mylon** wooden chair, wood type beech heartwood

mylon

The flowing, uninterrupted lines of the **mylon** chair make for harmonious pairing with a wide range of tables. The elegantly curved backrest and ergonomically shaped seat – whether in pure solid wood or upholstered in fabric or leather – provide superior seating comfort which goes far beyond that of an ordinary wooden chair.

fig. above from L to R: **mylon** wooden chair, wood type walnut | wood type oak white oil, black leather | wood type oak white oil | wood type beech heartwood | wood type walnut, brown natural leather | wood type beech heartwood, Canvas 764 fabric | wood type cherry

PAINTING WITH WOOD

We produce every solid wood panel ourselves for our furniture in our board factory. At the same time we take meticulous care to produce with the highest quality. In order to fit every wood pattern harmoniously, we assemble the wood for the top layers of the three-layer solid wood panels for fronts and table tops of our customised furniture by hand: handmade works of art. We call this "painting with wood".

Learn more about the three-layer technology on page 11.

cubus

The 25-mm strong top board and side pieces crafted from solid wood are characteristic for the diverse **cubus** occasional furniture line. The **cubus** shelf system also provides a wide range of planning options for both stylish and functional furnishings in the dining room.

fig. above right: **cubus** shelving highboard 1, wood type oak, matt medium grey glass

SOUND SYSTEMS MADE OF WOOD

home entertainment

The programme of your choice: innovative **cubus**, **cubus pure** and **filigno** home entertainment furniture provides technically sophisticated solutions for all areas of entertainment electronics – whether as a part of a wall unit or as standalone furniture.

home entertainment

What does our home entertainment furniture have in common with guitars, violins or pianos? A body made of solid wood – this lets the acoustics develop in an optimal manner and also meets all of the technical requirements of modern home entertainment equipment. Different wood types, acoustic fabric in various colours and a broad range of glass colours offer you multiple design options. A specially developed subwoofer element ensures that the subwoofer remains unnoticed but is heard loud and clear.

A cable flap provides easy access to the cabling which can run through several elements.

The TV column rotates almost 360°, height-adjustable, with an integrated cable duct.

home entertainment

This ingenious furniture provides plenty of space for your home entertainment systems, convenient cabling accessible through the flap as well as enough space for the ideal ventilation of your equipment.

The intelligent ventilation system can be supplemented with optional integrated electric fans.

”

sol is a stylish and extremely versatile companion for everyday life. Real wood, finest materials and state-of-the-art technology:

Sebastian Desch, designer

sol

A smart solo piece and a true multitalent. The leather-covered extendable writing top reveals the many clever additional functions hidden inside and offers space to sit comfortably. Dimmable LED lighting in the optional add-on ensures plenty of light.

fig.: **sol** solo piece with add-on, wood type walnut, anthracite leather

”

In a refreshingly light-footed manner, the filigno writing desk combines analogue storage space with the technical convenience and benefits of our digital age.

Sebastian Desch, designer

filigno

The **filigno** writing desk is ideal for the modern home office furniture, combining an elegantly slender and light style with smart technology on the inside.

figs. above and right: **filigno** writing desk, wood type oak white oil, matt black base | **lui** chair, wood type oak white oil, black natural leather

fig. left: **filigno** writing desk, wood type walnut | **magnum** cantilever chair, black Stricktex, matt black frame

filigno

Numerous functional extras make the **filigno** writing desk a fully equipped home office: from power supplies for various devices through to perfect organisation of your office accessories. With the skilful combination of practical storage space, modern technical features and an elegant shape, it won the iF DESIGN AWARD 2020.

it brings the desk to the
right height, step by step

A CUSTOM-MADE WELCOME

filigno

filigno's elegant 12 mm wood casing looks impressive in the entry hall too. **haiku** is the perfect companion, reflecting the delicate lines of **filigno** in its beautifully bevelled front edge. **hood** completes this informal entry hall combination, providing a place to hang clothing and much more.

“
*hood is an attitude expressed in
 furniture: powerful, genuine through
 and through, natural and casual.*

Sebastian Desch, designer

haiku | filigno | cubus pure

Together with **haiku** and **hood**, the **filigno** dresser and the **cubus pure** flap-door shoe cabinet offer a large variety of exciting combination possibilities for individual arrangements of the entry area.

fig. above: **cubus** entry hall, wood type oak white oil, matt white glass | **hood** clothes rack, wood type oak white oil | **filigno** dresser, wood type oak white oil

fig. left: **cubus pure** entry hall 13: **haiku** wardrobe panel and mirror panel, wood type walnut | **cubus pure** flap-door shoe cabinet, wood type walnut with beech interior, matt white glass

hood | hood+

Its sleek design makes the **hood** clothes rack a versatile addition to the entry hall. Its expansive arms offer plenty of room for your clothing and there are convenient hanging points. Big brother **hood+** is even more generous – available in either 110 or 130 cm widths.

fig.: **hood** clothes rack and clothes hangers, wood type walnut
hood+ clothes rack and clothes hangers, wood type oak

clothes hanger

Made from a single piece of solid wood, our clothes hanger makes a highly sophisticated impression.

shoehorn

The pleasant texture of real wood can be felt with the shoehorn as well. Its favourite place: hanging from the **hi!** side table.

cubus pure

Whether it's glass in the colour of your choice according to the NCS system or wooden surfaces sorted by hand – you would be hard pressed to find a more beautiful welcome to your home than that of our customised **cubus pure** entry halls. A nice message on the magnetic solid wood wall might make it even sweeter.

fig.: **cubus pure** entry hall 11, wood type walnut, matt black glass

cabus pure

Entry hall solutions that integrate completely into the room architecture offer not just a clear, minimal design but also enough storage space for clothes and shoes. Oak blocks enrich the entrance area with the tangible power of living wood and serve as convenient stools or storage surfaces.

figs. above and left: **cabus pure** entry hall 10, wood type oak, matt anthracite glass | solid wood block in smoked oak

fig. right page: **cabus pure** entry hall 8, wood type oak, matt dark brown glass, dark brown leather

cubus

A wide range of design options, including an extensive modular element and wardrobe system, allow you to create a hallway design that is perfectly suited to your requirements. Whatever your space situation and storage needs, our **cubus** entry hall programme has the right solution for you.

fig.: **cubus** entry hall, wood type beech heartwood, matt taupe glass

cubus

The flexibility of **cubus** also makes compact furniture plans possible that meet all of the basic requirements for an entry hall: space for clothes and shoes, a mirror, and a shelf. The artful magnetic wall made of solid wood offers a place for messages.

fig. above left: **cubus** entry hall 25, wood type beech heartwood

WE ARE DEDICATED TO CREATING FURNITURE THAT'S JUST AS UNIQUE AS WOOD ITSELF.

– *it's a tree story:*

simple day-to-day care

Our solid wood furniture is not only pleasant to the touch – it also holds up well with daily use. Day-to-day cleaning just needs a dry or slightly damp cotton cloth.

product care and repair

The open-pore finish of our wooden surfaces means small dents and scratches are easy to treat. Even the traces of many years of use can be removed: sand down, apply oil, and you're done.

Watch our
care video!
[qr.team7.at/
maintenance-video](https://qr.team7.at/maintenance-video)

room climate

The solid wood furniture feels most comfortable at a constant humidity level of between 40% and 60%, and a room temperature of between 18° and 23° Celsius – just like us humans.

Ecolabel

The Austrian Ecolabel verifies that the wood we use comes from sustainable forestry and contributes to a healthy living environment due to its special surface treatment. It is also a mark of high-quality products that excel in durability, serviceability, as well as safety and comfort in daily use.

ISO, EMAS

The EMAS certificate is proof of our sustainable production, efficient use of resources and that we comply with the applicable environmental laws. As an ISO-certified company, we stand for the implementation of internationally applicable standards in the areas of environment, quality, and safety.

test lab

This means that, even in the development phase, we test the function, ergonomics, stability, and safety of our products comprehensively in our own laboratory, over thousands of cycles. TEAM 7 offers only tailor-made furniture – with perfected technology and function.

conservation of resources

Purchasing with the right attitude. Contrary to the current trends toward global sourcing, we have always relied on regional partners and suppliers. This ensures short transport routes and avoids unnecessary emissions of harmful substances. Plus, our regional, carefully selected supplier network means more flexibility for our customers. This not only protects nature, it also preserves our independence.

CONSERVATION OF RESOURCES

NATURE SUPPLIES US WITH IDEAS AND ENERGY.

We purchase 100% green electricity for our production facilities. What is more, our photovoltaic power plant generates 390,000 kWh per year. That covers the annual electricity consumption of over 85 average Austrian households.

CONSUME LESS, CREATE MORE.

Thanks to targeted energy-saving projects, such as an intelligent light control, new ventilation or efficient heat recovery systems, we have reduced our annual total energy consumption from 14.8 million kWh to 12.8 million kWh since 2012. We have simultaneously been able to improve manufacturing efficiency.

THE PURCHASE OF GREEN ELECTRICITY
COMBINED WITH OUR PHOTOVOLTAIC SYSTEM
SPARE THE ATMOSPHERE ANNUALLY

2,000 t CO₂

1,300 t CO₂

IS WHAT WE SPARE THE ATMOSPHERE BY
PRODUCING HEAT THROUGH BIOMASS IN COMPARISON
TO BURNING FOSSIL FUEL-BASED NATURAL GAS

DURABLE FURNITURE FROM NATURAL MATERIALS.

Treated wood surfaces can easily be repaired and covers reupholstered. This transforms our furniture into loyal companions for many years to come. All our furniture is manufactured in such a way that it can be returned to the natural cycle at any time.

OVER THE NEXT GENERATIONS,
THE SOLID WOOD FURNITURE WE PRODUCE
EVERY YEAR WILL BIND

6,000 t CO₂

CO₂-NEUTRAL ENERGY GENERATION.

The scraps of wood accumulated from production are used in the company's own furnaces for heat production, making us completely energy self-sufficient. Since wood is biomass, no more CO₂ is released during combustion than that which the trees have withdrawn from the atmosphere during their growth. This enables a CO₂-neutral energy generation.

SUSTAINABLE PACKAGE.

When packaging our furniture, we avoid plastics and instead use cardboard from recycled waste paper, custom-fitted to the piece we are packing. This preserves resources, saves on padding and provides the best possible protection in transit.

EMAS ENVIRONMENTAL STATEMENT

Everything on our journey to becoming a green factory as well as our efforts to consistently align all activities of TEAM 7 with the principles of sustainable management can be read about in our EMAS-approved environmental statement.
